## THE CENSUS.

The population of the Colonics now comprised in the Dominion of Canada was, in January, 1861:-

	Males.	Females.	Total.
Upper Canada (now Ontario)	725,575 567,864 129,948 165,584	670,516 543,702 122,099 165,273	1,396,091 1,111,566 252,047 330,857
To this we must add, if we desire to show the full strength of tne British population in North America, at that date:—	1,588,971	1,501,590	3,090,561
Prince Edward Island.  Newfoundland (1857).  British Columbia and Vancouver's Island.  Rupert's Land, including the Red River Settlement	40,880 65,118 20,862 51,000	39,977 59,170 13,954 50,000	80,857 124.288 34,816 101,000
Total*	1,766,831	1,664,691	3.431,522

If we desire to know the population of the Dominion, and of all British North America at the present time, the safest method of calculation is to find the rate of increase of each colony between the census of 1861 and that last previous, and to suppose the same rate to have continued since 1861. Adopting this principle for Ontario, Quebec, New Brunswick, Nova Scotia and Prince Edward Island, (where the rate of increase had been about 4.34 per cent., 2.50 per cent., 2.60 per cent. 1.82 per cent., and 207 per cent. per annum respectively) and making estimates for the rest, we have, as the population in January of 1868, and each successive year until 1871:—

<del>-</del>	1868.	1869.	1870.	1871.
Ontario. Quebec New Brunswick. Nova Scotia	1,880,350 1,321,074 302,950 375,511	1,962,067 1,354,067 311,027 382,365	2,047,334 1,387,884 319,398 389,343	2,136,308 1,422,546 327,800
The Dominion	3,879,885	4,009,526	4,143,959	4,283,103
Prince Edward Island. Newfoundland British Columbia Rupert's Land.	93,338 131,000 50,000 105,000	95,272 132,000 55,000	97,246 133,000 60,000 115,000	99,261 134,000 65.000 120,000
All British North America	4,259,223	4,401,798	4,549,205	4,701,364

If we desire to question the future still further, it will not be safe to pursue the same mode of calculation, for the progress of the older colonies will not be so rapid as it has been, while that of the younger will be greater. We may, however, with some pretension to probability, assume that the rate of progress of the population of all British America will be as rapid for fifty years or more as it has been for the past decade, and this would give as the population

In 1861 3,431,522	In 1921 22,694,000
1871 4,701,364	1931 31,092,000
1881 6,441,000	1941
1891 8,825,000	1951 58,361,000
1901 12,090,000	1961 79.957,000
1911 16,564,000	1971109,540,000
