BANK NOTE ENGRAVING.

Bank Note engraving has become an established industry in Canada since our last Year Book was written. All that was previously done was the mere printing of the plates engraved in the United States. The Government circulation above alluded to was principally engraved and wholly printed by the British American Bank Note Company of Montreal and Ottawa. The machinery they employ, which combines all the modern improvements, is very costly and most beautiful in its operation, and of itself merits a visit to Ottawa to see. Like the American Companies which do this business, the Canadian Company is formed by a union of men of talent in the several kinds of engraving which have to be brought to bear on a Bank Note. It is not too much to say that the engraving of the Government circulation and of the notes of the Bank of Commerce, also done by the Canadian Company, is of a character of which any country may well be proud, especially a young one like the Dominion; and it is also cause for satisfaction that to a Canadian—Dr. T. S. Hunt of Montreal—belongs the credit of inventing the only ink—a pecular green called the Canada Bank Note Printing Tint, to be seen on almost all our notes—which defies the art of the photographic counterfeiter of currency.
