PREVALENCE OF INSANITY IN CANADA.

There would seem to be a somewhat general impression prevailing in Canada* that native Canadians are more subject to insanity than persons from the "old country." Of the many interesting questions connected with the subject of insanity, there is none which comes more home to us than that of the frequency or prevalence of this fearful malady amongst our people. We have, therefore, much satisfaction in submitting afresh the reassuring remarks on this question of Dr. Joseph Workman, the Medical Superintendent of the Toronto Asylum, an able and experienced Alienist and Statistician. In his printed report for 1864, that officer adduces statistics which conclusively establish the erroneousness of the general opinion on this important subject. He gives a summary of the National origins of nearly 1000 patients admitted into the Toronto Asylum in 1864, and the five preceding years.

NATIVITIES of 995 patients admitted in six years, from 1859 to 1864 inclusive.

Years.	Ireland.	Canada.	Scotland.	England,	U. States.	All others.	Total.
1859	51 64 79 56 53 50	23 38 55 61 54 35	21 34 24 24 22 24	16 32 25 29 24 17	9 9 11 2 6 6	5 8 10 5 9	125 185 204 177 168 136
	353	266	149	143	43	41	995
Per cent	35 49 13 70	26 73 64 70	14 97 707	14 37 8 18	4 32	4 12	in 995 in 1,396,091

[&]quot;The lowest line," observes Dr. Workman, "shows the relative percentage of the four chief nationalities in the whole population of the Province, which according to the census of 1860-61, was 1,396,091, the following being the actual numbers, viz:—

^{*} By Canada is meant here, the late Province of Canada, comprising the Provinces of Ontario and Quebec.
