As Coal is rapidly superseding Wood in all large Cities, we beg to draw attention to the Fuel supplied by this Company :

As a Steam Coal the most careful tests prove it to be superior to any Scotch or English Coal imported.

For Grates and Stoves, it is much more-economical than either Wood or Anthracite Coal.

For Cooking Ranges it answers admirably.

This Company is a Montreal organization, and has introduced here, during the present season, over *forty (40) thousand tons* of Coal, which have been sold at lower rates than ever ruled before in this market, notwithstanding the duty—it, therefore, deserves a preference.
