† See Notes to previous Table.

MISCELLANEOUS TABLES FROM SINGLE STATIONS.

The following was forwarded by Mr. John Murray, of Spence's Bridge, Thompson's River, British Columbia, being the results of observations made by him in 1870.

The distinctions between windy and calm days, and between cloudy and clear days are not very precise, but the numbers will serve for an approximate comparison of the different months with respect to the wind and the state of the sky.

TABLE shewing the Monthly Mean Temperatures at Noon, with the number of days in each month designated as windy and calm, cloudy and clear, and the number of days in which Rain and Snow fell, for the year 1870.

1870.	Mean Temperature at Noon.	Number of Days.					
		Windy.	Calm or Light Wind.	Cloudy.	Clear.	Rain.	Snow.
January	25 0	11	20	17	14	1	5
February.....	38 0	10	18	15	13	3	3
March.....	42 0	12	19	12	19	1	5
April.....	64 0	25	5	14	16	5	2
May.....	69 0	23	8	15	16	5	0
June.....	79 0	16	14	13	17	4	0
July.....	83 0	19	12	13	18	6	0
August.....	81 0	12	19	6	25	2	0
September.....	73 0	14	16	12	18	4	0
October.....	56 0	14	17	17	14	2	1
November.....	46 0	8	22	10	20	2	1
December.....	29 0	6	25	16	15	2	2
Sums.....	685 0	170	195	160	205	37	19
Mean Temperature of year.....	57 1
