507. The quantity and value of provisions exported in 1892 were both much greater than in any previous year. It will be seen that almost the whole trade is with Great Britain; out of a total value exported during the period of \$202,986,589, the exports to the United Kingdom are represented by \$167,758,679, being 82½ per cent. The proportion in 1892 was 95 per cent. Exports principally to Great Britain.

508. The exports of hog products, as pork, bacon, hams and lard, are small to what they ought to be, and though there was an increase in 1892, were not as much as in 1882, and it was with the intention of encouraging farmers to pay more attention to this branch of farming, that the Dominion Government, in 1890, placed an additional import duty upon pork. There is undoubtedly a wide scope here for the farmer, if he will only give the matter attention. As it is, Canadian bacon will always bring from one to one and a half cents per pound more than that from the United States, and this difference can easily be increased by improving the quality. Denmark, with a Supply of pork in Canada.
