557. The Grand Trunk system carried the largest share, viz., 37 per Proporcent of the total freight, as compared with 35 per cent in 1891, but a tion of smaller proportion than in any of the four preceding years. The carried by Canadian Pacific Railway carried 18 per cent as compared with 17 per principal cent in 1891, but the Canada Southern only carried 14 per cent as lines. against 18 per cent in 1891. The freight returns having been made in tons only, and not in quantities according to kind, as formerly, no comparison can be made with former years, except that there was a
