

for their guidance the same definition as that placed in the hands of the enumerators of 1881 for their guidance. They would not have done their sworn duty if they had not taken these small industrial establishments.

The Statistical Branch of the Department of Agriculture exercised great care in compiling the returns of the enumerators, and cut out all very small industries, where the output, though making a large sum in the aggregate, was in each individual case evidently an adjunct to a regular occupation, rather than the occupation by which a livelihood was obtained.

283. For the purpose of presenting the results of the census of 1891 in as compact a form as possible, the industrial establishments have been grouped together, not with scientific accuracy, but with the design of bringing together in the groups such industries as are more or less allied to each other, so that comparison with similar groups, as obtained by the census of 1881, can be made.

These groups are arranged alphabetically for convenience, and give particulars of number of establishments, number of employees, annual amount of wages paid, and annual value of output.
