1024. The following table shows that if the exports of 1883, \$57,702,000, are estimated at the export prices of 1894, they would amount to \$77,616,000, 1883 exports being \$10,086,000 more. Deducting this amount from \$16,460,000, actual difference, it leaves the exports of 1883 less than 1894 by \$6,374,000.
