

have, therefore, been the most closely scrutinized in the Statistics Branch, without, however, much change being required. The seamstress, with her sewing machine, making a living and supporting others by her labour, is as much a wage-earner and a contributor to the sum total of the value of the industrial output of the country as the sewing girl in a factory. There was in some cases a tendency on the part of enumerators to place a value upon the room the seamstress occupied, as an industrial establishment, but such tendency was strictly suppressed. All her capital was her sewing machine, and that was capital invested just as much in the instance where there was but one sewing machine as in the instance where there were a dozen in use in one building. The same general directions were given in 1891 as in 1881 in this matter, and if more dressmaking and millinery establishments, big and little, were returned, the presumption is that they were in existence and were, therefore, rightly returned.

300.—MISCELLANEOUS.

INDUSTRY.	No. of Establishments.	Capital.	Number of Employees.	Wages.	Value of Output.

301. In this group there is very little chance for comparison of 1891 with 1881, the "Miscellaneous" having been given in the lump, without detail in the compilation of 1881. A few details have been secured. The
