

832. The following table is a statement of the quantity and value of exports, the produce of Canada, during the two years 1894 and 1895, the principal articles being in detail. Complaints were frequently being made that the classification in use in the Trade and Navigation Returns did not do justice to the manufacturers of Canada. A different classification, therefore, has been adopted, the grouping of some of the articles having been changed. The principal differences are that scrap-iron and salt have been transferred from wherever they were found in "products of the mine," and ashes, pot, pearl, leached and all other, treenails, lathwood, staves, headings, shingles, box shooks, and sawn lumber of all kinds, from "products of the forest" to "manufactures," to which class they belong. All the tables in this chapter, where exports are given by classes, have been changed to suit this re-arrangement.
