

year since Confederation, according to the returns made to the Government, as required by the Bank Act. These averages are made up from the twelve monthly returns sent by all the banks to the Government during the calendar year. This is thought to be better than the plan previously adopted of taking the returns for the month of June in each year :—

PARTICULARS OF BANKS IN CANADA, 1868-1895.

*Includes the deposits of the Federal and Provincial Governments.

The capital paid up has remained practically the same for a good many years. The notes in circulation from 1884 to 1895 (12 years) have been more in 9 years and less in 3 years than in 1895. The total deposits have gone on steadily increasing and in 1895 were over 86 per cent more than in 1884. The total discounts have, in the same period, increased over 56 per cent. Comparing 1895 with 1894 it is seen that notes in circulation and total discounts have decreased, and that deposits have increased.

Paragraph 943 gives the deposits in the chartered banks, not including the deposits of the Federal and Provincial Governments.
