

with a gross tonnage of 234,711 tons; in 1893, 1,538 steamers with 241,172 tons gross; in 1894, 1,640 steamers with a gross tonnage of 240,906 tons, and in 1895, 1,718 steamers with a gross tonnage of 247,007. Apparently, the steamers were more in tonnage in 1886 than they have been since. Probably this arose from the transfer of ocean steamers from the Canadian to the British Registry—a process which goes on from year to year, more or less, and in some years more than in others—unaccompanied, however, by change in ownership.

1119. Analysis of the returns (which are published once every three years) at different periods gives the following results in net tonnage:—

* These figures differ from those given on pages 719 and 720, the above being net tonnage and the others gross tonnage of steamers.

Comparing 1892 with 1883, the analysis shows that the decrease has been 303,043 tons; that steamers decreased by 58,691 tons; ships by 71,665 tons; barkentines, brigs, barks and brigantines by 232,863 tons, and barges by 12,866 tons; that among increases are schooners, with an increase of 69,814 tons, and sloops, with 3,106 tons of an increase; that schooners are increasing in size, the average schooner in 1892 having a registered tonnage of 61 tons against 43 tons in 1883, and that the barge and the wood-boat are slowly retreating before other conveyances of a better type.

The ships of 1892 averaged 1,457 tons each; those of 1883 averaged 1,280 tons; of 1873, 1,088 tons, and of 1867, 1,028 tons.

The class of vessels designated barks, barkentines, brigs and brigantines averaged in 1867, 290.14 tons; in 1873, 377.25 tons; in 1883, 546.95 tons, and in 1892, 578.17 tons.
