The following table shows the Civil Condition of the people of Canada, 1901:—

Conjugal State.	TOTAL.		Males.		FEMALES.	
	Number.	Per Cent.	Number.	Per Cent.	Number.	Per Cent.
Single	3,312,593 1,833,043 250,186	61 · 67 34 · 14 4 · 19	$\begin{array}{c} 1,743,582 \\ 928,052 \\ 73,837 \end{array}$	63·57 33·74 2·69	1,564,011 904,091 151,181	59·72 34·51 5·77

The corresponding figures and percentages for the Census of 1891 are:

Conjugal State.	TOTAL.		Males.		Females.	
	Number.	Per Cent.	Number.	Per Cent.	Number.	Per Cent.
Single	3,053,392 1,588,055 191,792	63·18 32·85 3·97	$\substack{1,601,541\\796,153\\62,777}$	65·09 32·35 2·56	$\substack{1,451,851\\791,902\\129,015}$	61·20 33·37 5·43

The figures for 1901 indicate that of the whole population of Canada (5,371,315, of whom 2,751,708 are males, and 2,619,607 are females) over 61 in every 100 were single, over 34 in 100 were married, and over 4 in a hundred were widowed—the divorced men and women (men 337 and women 324) being together, one in every 5,600 of the population. From the Census of 1891 it appears that 63 in every 100 were single, 33 married, 4 widowed.

This comparison indicates that Canada has a larger proportion of married people now than it had in 1891, and also a larger proportion of widowed, and that adding the single and widowed together the difference is: 1891, 67·15 per cent; 1901, 65·73, a difference of 1·42 per cent in favour of 1901.

It will thus appear that the people of Canada are marrying and giving in marriage in larger numbers than they were at the time of the taking of the Census of 1891. At any rate it can fairly be stated that the marriage rate has not decreased.
