

MANUFACTURES.

For the purpose of presenting the results of the Census of 1901 in as compact a form as possible, the industrial establishments have been grouped together, not with scientific accuracy but with the design of bringing into the groups such industries as are more or less allied so that comparison with similar groups as obtained in the Census of 1891 can be made.

In the Census of 1901 the statistics of manufactures were taken only for establishments employing five hands or more. In the Census of 1891 the returns of all establishments were compiled.

The results were divided into five groups according to output as follows:— Establishments having an output (1) of under \$2,000 a year, (2) of \$2,000 to \$12,000, (3) of \$12,001 to \$25,000, (4) of \$25,001 to \$49,999, and (5) of \$50,000 and over.
