MISCELLANEOUS AGRICULTURAL STATISTICS.

Production of Flax Fibre in Ontario, 1918.—According to information furnished by the Economic Fibre Production Division of the Dominion Experimental Farms, 20,000 acres were grown for flax fibre production in Ontario in 1918, giving an average of 310 lb. of pure line fibre per acre, valued at 55 to 70 cents per lb., according to grade. The fibre was of fair quality, but short and not quite so uniform as the 1917 crop. There were 900 tons of tow, which was graded at prices ranging from 8 to 20 cents per pound. Under an Order in Council dated October 23, 1918, all Canadian seed of fibre variety, amounting to 110,000 bushels, was commandeered and shipped to Ireland, the price realized being \$27.50 per sack of 182 lb. Table 26 gives an approximate estimate of the area, production, and value of flax grown for fibre in Ontario for each of the four years 1915-18.
