

GRAIN STATISTICS.

A description of the arrangements for the storage, inspection, grading and shipment of Canadian grain has been given in previous issues of the Year Book (see pp. 454-457 of the edition of 1914). Tables 28 to 32 give the principal grain statistics for a series of years. For the year 1919-20 the total storage capacity of the 3,855 grain elevators in Canada was 231,213,620 bushels, these figures representing an increase from a total of 523 elevators and warehouses with a capacity of 18,329,352 bushels in 1900-01. Under the Canada Grain Act, 1912, the Dominion Government has power itself to erect and operate terminal grain elevators. Five such elevators are already in operation, and are situated respectively at Port Arthur (Ont.), Saskatoon (Sask.), Moosejaw (Sask.), Calgary (Alberta) and Vancouver (B.C.).

Table 28 shows, for the crop years 1901 to 1920, the number of railway stations at which elevators are placed, the number of elevators and warehouses and their total storage capacity, the figures being given by provinces for the country elevators of the West, and by description of elevators for the rest of the country. Tables 29 and 30 give statistics of the inspection of grain for the fiscal years 1919, 1920 and 1921, and Tables 31 and 32 of the shipment of grain by vessel and rail for 1919 and 1920.

28.—Number and Storage Capacity of Canadian Grain Elevators in the crop years 1901-1921.
