

of the college experimental work, including results obtained, are published in the Annual Report of the Secretary for Agriculture for the Province.

The College enrolls about 50 to 100 students annually in its regular course and from 200 to 300 annually in various short courses. Numerous extension short courses are annually conducted at various centres in the province.

A college prospectus, issued annually, contains complete accounts of the nature of the studies in these courses.

### Quebec.

**Macdonald College, Ste. Anne de Bellevue.**—The College is situated about 20 miles west of Montreal and is incorporated with McGill University. The College property comprises 786 acres, divided as follows: main farm, 584 acres; agronomy plots, 75 acres; poultry department, 17 acres; orchard, 35 acres; vegetable gardens, 25 acres; the campus, including driveways, lawns, trees, shrubs, flower beds, school garden and recreation fields for students of both sexes, 50 acres. The agricultural engineering, agronomy, animal husbandry, bacteriology, botany, chemistry, horticulture, physics, poultry, zoology and entomology departments are all well equipped for the numerous researches and experiments under way. In the *School of Agriculture*, the courses offered include 4-year courses, leading to the B.S.A. and B.Sc. in Agr. degrees, a 4½ months winter practical course for farmers and farmers' sons, and various short courses. Postgraduate work can be taken in agronomy, bacteriology, chemistry, entomology and plant pathology—the higher degrees offered being M.S.A., M.Sc. and Ph.D. In the *School of Household Science*, the courses include a 4-year course, leading to the degree of Bachelor of Household Science, a 2-year institution administration course, a 1-year home-maker course, three short courses, each of about 3 months duration, in household science, etc. In the *School for Teachers*, courses under the Protestant Committee of the Council of Public Instruction of the Province of Quebec are offered leading to model, kindergarten and elementary diplomas. The teaching and experimental staff of the College consists of about 60 members. The total enrolment for 1922-23 was 768. More complete information respecting the work of the College will be found on record in the Canada Year Books of 1916-17, pp. 241-242, and 1918, pp. 235-237. The annual report of the College and the annual announcement should be consulted.

**School of Agriculture, Ste. Anne de la Pocatière.**—This school, with accommodation for 125 boarders, is situated on the southern slope of a hill dominating a farm of nearly 600 acres. Within one mile of the Intercolonial Railway and on the Quebec-Rivière-du-Loup line, it is easily accessible, and attracts thousands of visitors, who seek agricultural information from both the school and the Dominion Experimental Station, which is not more than a mile from the village. The students of the school are divided into (1) those taking a four-years' agronomic course, and (2) those receiving special practical training for two years. The school is affiliated to Laval University, Quebec, which awards the degree of B.S.A. (Bachelor of Science in Agriculture) to successful students of the first class, whilst those in the other receive a Certificate of Agricultural Proficiency (Brevet de Capacité Agricole). Lectures in adjacent parishes are frequently given by the school professors, who also conduct agricultural pages in two of the largest provincial weeklies for the extension of new agricultural information. Cultural experiments are also undertaken at the school, and bulletins are published.
