Other fibre.....	—	299	—	13,800
Total for Canada.....	2,150,251	2,475,904	84,947,598	99,073,203

The paper-making stage of the industry involves the consumption of wood pulp and other paper stock in the manufacture of paper and other pulp products. Accurate annual statistics for this part of the industry are only available for the years 1917 to 1923, inclusive. These are given in Table 10. The main classes are further subdivided into about thirty sub-classes of which details are given in Table 11 for the years 1922 and 1923.
