¹ Includes all coal shipped to any point in Ontario from western mines.

The apparent consumption during 1923 amounted to 38,023,485 tons, as compared with 27,596,273 tons in the preceding calendar year. In 1923, the output was 16,991,000 tons, the quantity exported amounted to 1,650,000 tons, and imports to 22,700,000 tons, resulting in an apparent consumption of 38,000,000 tons. The data given in Tables 28 and 29 show the amount of coal made available for consumption in the entire country for a period of 23 years and in each of the provinces during 1923. The data of output and of interprovincial shipments were compiled from monthly statements furnished by the coal operators.
