**Wealth of Canada by Items, 1921.**—The capital invested in the farms of the country, including implements and live stock, as determined by the last decennial census, was the largest item in our national wealth, aggregating \$6,587,000,000, or 29.68 p.c. of the whole. The value of agricultural production in 1921, \$1,396,000,000, was also included to cover the average stocks of agricultural goods in the possession of farmers and traders and the amount invested in the preparation for the new crop. Thus the agricultural wealth of Canada totalled \$7,983,000,000, nearly 36 p.c. of the wealth of Canada.

The second largest element in the national wealth was urban real property. This includes the assessed valuations of taxed and exempted property, to which was added one-third to provide for under-valuation by assessors and for roads, bridges and sewers. The estimated value, as based on returns for 1921 received from municipalities, was \$5,752,000,000, or 25.91 p.c. of the total wealth of the Dominion.

The wealth invested in steam railways, computed from the cost of road and equipment, and distributed by provinces on the basis of mileage, constituted the next largest item, amounting to \$2,159,000,000, or 9.73 p.c. of the total.
