

"fees of office" employees, who were not included in the report published in 1925. These employees were largely in the Departments of Marine and Fisheries and Public Works. There remain, however, many persons in the "non-enumerated classes", whose numbers cannot be supplied monthly by the departmental officials, but whose compensation is included in the monthly figures of expenditure on personnel, as supplied in Table 42.

¹Figures for January, 1925, are not comparable with those for preceding Januaries, because the monthly records now being published include various classes of employees not included in the historical record for the 13 years, 1912-1924. In Table 42 will be found comparable figures of employees in the various Departments in April, 1924 and April, 1925.

Table 42, which gives statistics by Departments, with a further classification by principal branches where such are recorded, is inserted to give comparable figures for the latest months. In dealing with the statistics for April, 1925, however, it must be borne in mind that, owing to adjustments and refunds which cannot be completed until the close of the fiscal year, the statistics for this month are subject to revision. In that month of 1925, the total number of employees in the enumerated classes was 38,883 and the total expenditure in wages and salaries for all classes of employees was \$5,828,783.97, as compared with 40,068 and \$5,920,492.80 respectively in April, 1924. The decrease in the number of such employees during the year is thus shown to be 1,185 and in the monthly salaries bill for all classes \$91,708.83, or at the rate of over \$1,100,000 per annum.
