shown in regular courses there are regular arts students included under classical colleges (over 2,000 in 1925) and also students taking full arts course extra-murally, under "correspondence" courses (about 1,300). ³³ Excluding business colleges and Indian schools in Quebec and including Indian schools in N.W.T. and Yukon. ³⁴ In calculating the numbers in elementary and secondary grades, night, special and part-time technical schools and schools for the blind and deaf are left out, except where the night schools were known to be high schools. The numbers in elementary grades in public and private ordinary schools, also in Indian schools, are known. Business college courses are assumed to be at least of secondary rank, also preparatory and short courses at universities and colleges, except in the case of certain affiliated schools in Ontario where allowance was made for the number in elementary grades. The regular courses are clearly of higher grade than secondary. ³⁵ Approximately. Since grade VIII in New Brunswick includes high school subjects and also work in arithmetic, etc., equivalent to the first year of high school, the enrolment in this grade (3,174) might be added to item 14 and deducted from item 13 in which case the number in elementary grades would read 73,576 and in secondary and higher grades 9,974.

General Note:—

To avoid the confusion that would result from giving totals different from those given in the provincial reports the figures of 1924 are used throughout for Quebec. In all cases except the primary and nursery schools the figures of 1925 are also published in the provincial reports, although the 1924 figures are used in making up their summary. The 1925 figures for each of the items in the above table except items 1 and 7 are as follows:—

Technical non-collegiate courses.....	10,665
Teacher-training.....	1,771
Blind and deaf.....	693
Short courses, universities and colleges.....	2,517
Classical colleges.....	9,904
Other colleges (regular).....	3,403
Universities (regular).....	7,280
Monument national lectures.....	984
Total.....	37,222

Further, to avoid confusion, the short courses for teachers at universities and colleges are entered under item 9 instead of item 3. There were 2,893 teachers in these short courses who might be added to the 10,230 in item 3, making 12,914 in all in teacher-training. There were in all about 63,000 teachers in Canada.
