

In comparing the two years it should be noted that the figures in the 1911 census refer to the calendar year 1910, while those in the 1921 census refer to the nine months immediately preceding June 1, 1921. It is particularly necessary to remember this when comparing the number and proportions attending from 7 to 9 months. The difference, however, is not so great as it might seem from the fact that one census referred apparently to twelve months, while the other referred to nine. Out of the twelve months would have to be deducted the vacation periods of about two months, although during these vacations summer schools (which were in existence in 1911 to a greater extent than in 1921) were in operation.

**43.—School Attendance of the Population 7 to 14 Years of Age, by Provinces, 1911 and 1921.**

<sup>1</sup> Exclusive of Yukon and Northwest Territories.

Table 44 shows the number and proportion of the population 7 to 14 years in each province, exclusive of Indians, who attended school for any period, and of those who attended for a full term. As stated elsewhere, 89.10 p.c. of the 1,508,846 children 7 to 14 years of age in the nine provinces (Indians excluded) attended school for some period and 80.25 p.c. were at school from 7 to 9 months in the school year.
