not elsewhere specified. ¹¹ Excluding preparatory and short courses and such other figures as have already been included in items 10 and 11. ²² The number of students of university standard in items 9 to 12 was 29,975, to which might be added 600 in colleges not reporting in 1926. ³³ Excluding business colleges and Indian schools in Quebec and including Indian schools in N.W.T. and Yukon. ³⁴ In calculating the numbers in elementary and secondary grades, night, special and part-time technical schools and schools for the blind and deaf are left out of the reckoning, except where the night schools were known to be high schools. The numbers in elementary grades in public and private ordinary schools, also in Indian schools are known. Business college courses are assumed to be of secondary rank, also preparatory and short courses at universities and colleges, except in the case of certain affiliated schools in Ontario where allowance was made for the number in elementary grades. ³⁵ Approximately. Since Grade VIII in New Brunswick includes high school subjects, the enrolment in this grade (about 3,800) might be added to item 14 and deducted from item 13, in which case the number in elementary grades would read 72,600 and in secondary and higher grades 10,650. ³⁶ Approximately.

General Note—

To avoid the confusion that would result from giving totals different from those given in the provincial reports the figures of 1925 are used throughout for Quebec. In all cases except the primary and nursery schools the figures of 1926 are also published in the provincial reports, although the 1925 figures are used in making up their summary. The 1926 figures for each of the items in the above table except items 1 and 7 are as follows:—

Technical and night.....	15,334	Monument National Lectures.....	836
Teacher-training.....	1,854	Historic Guides.....	60
Blind and Deaf.....	661	Schools of Fine Arts.....	901
Classical Colleges.....	10,430	Dairy Schools.....	281
Other Colleges.....	7,795	Ranger's School.....	20
Universities (regular).....	8,478		
		Total.....	46,650

Further, to avoid confusion, the short courses for teachers at universities and colleges are entered under item 9 instead of item 3. There were about 2,700 teachers in these short courses who might be added to the 9,720 in item 3 making about 12,400 in all teaching-training. There were in all about 64,000 teachers in Canada.
