¹ Primary schools including Protestant high schools, 1925. The high school enrolment is not filled out because it would not be complete without including the high school pupils of the classical colleges and independent classical schools and of the normal schools. ² The figures by sex represent high schools and collegiate institutes only; the totals include pupils in fifth classes.

Secondary Education.—In the past quarter of a century the number of pupils of both sexes doing work of secondary grade has shown a very great absolute increase, as well as a large increase relatively to the number in elementary grades. The available statistics are given by years in Table 5, showing that in each of the provinces and in every year the number of girls in the secondary grades has exceeded the number of boys. The drop in the Ontario figures between 1915 and 1917 is due in part to the change in the statistical year from the calendar year to the natural school year from September to June.

5.—Publicly Controlled Schools in Canada: Comparative Number of Boys and Girls doing work of Secondary Grade in Six Provinces, 1901-1926.¹

¹ 1924—P.E.I., inc. P.W.C., 719-1,113; N.B., approx. 1,363-2,074; 1925—P.E.I., inc. P.W.C., 659-1,087; N.B., approx. 1,498-2,171; 1926—P.E.I., inc. P.W.C., 733-1,098; N.B., approx. 1,535-2,264. ² Includes the pupils of continuation schools, high schools and collegiate institutes only. In 1925-26 in all secondary grades reported there were approximately 40,570 boys and 47,986 girls. These included full-time day vocational, public and separate schools. The figures in the table are for comparative purposes confined to continuation and high schools and collegiate institutes.
