

Section 3.—Cost of Living of Wage Earners.

An index number of the cost of living in working men's families has been computed by the Department of Labour since 1913, and is published monthly in the *Labour Gazette*. This index is specifically designed for the purpose of measuring the trends of the cost of living for certain wage-earning classes with a somewhat lower standard of living than that which is measured by the Bureau of Statistics index number of retail prices, shown on page 780 of the present volume. This wage-earner's index number is used extensively in the fixation of "fair wages" on Government contracts and in the settlement of industrial disputes. An abridgement of this index is presented in Table 6.

6.—Changes in the Cost of Living in Canada from 1913 to 1928¹.

(Average prices in 1913=100).
