Infantile Mortality in Canadian Cities.—Table 28 shows for the cities of 40,000 population and over in the registration area of Canada the number of infant deaths and the rate of deaths per 1,000 living births, for the years 1924 to 1928. In the latter year Vancouver had the lowest infant death rate, 43·3, with London the next lowest, 52·9. Ottawa and Saint John had comparatively high death rates, 106·7 and 95·2 respectively, the death rate in the capital comparing unfavourably with that in the three other leading cities of Ontario (Toronto, Hamilton and London), their rates being 72·4, 63·2 and 52·9 respectively. Since 1923 the rate of infantile mortality in Halifax has shown a marked decline of 48 p.c. from 138·2 to 71·6, and that in Ottawa a decline of 19 p.c. from 131·3 to 106·7.
