already been included in items 10 and 11. ³²All these are of university standard. ³³Excluding business colleges and Indian schools in Quebec, and including Indian schools in N.W.T. and Yukon. ³⁴In calculating the numbers in elementary and secondary grades, night, special and part-time technical schools, and schools for the blind and deaf are left out of the reckoning, except where the night schools were known to be high schools. The numbers in elementary grades in public and private ordinary schools, also in Indian schools are known. Business college courses are assumed to be of secondary rank, also preparatory and short courses at universities and colleges, except in the case of certain affiliated schools in Ontario, where allowance was made for the number in elementary grades. The regular courses are clearly of higher grade than secondary. ³⁵Approximately. Since Grade VIII in New Brunswick included high school subjects, the enrolment in this grade (about 3,753) might be added to item 14 and deducted from item 13 in which case the number in elementary grades would read 74,819 and in secondary and higher grades 11,073. ³⁶Approximately. ³⁷Not including certain students in extension courses in agriculture. See section 3 of this chapter on higher education.

*General Note—

To avoid the confusion that would result from giving totals different from those given in the provincial reports the figures of 1927 are used throughout for Quebec. In all cases except the primary and nursery schools the figures of 1928 are also published in the provincial reports, although the 1927 figures are used in making up their summary. The 1928 figures for each of the items in the above table except items 1 and 7 are as follows:—

Technical and Night. (See item 2).....	11,270
Normal Schools.....	1,950
Blind and Deaf. (See item 5).....	740
Classical Colleges. (See item 10).....	10,894
Short, Special, etc. (See item 9).....	3,760
Affiliated Colleges, etc. (See item 11).....	6,223
Universities. (See item 12)..... (Approx.)	7,319

Further, to avoid confusion, the short courses for teachers at universities and colleges are entered under item 9 instead of item 3. There were about 2,000 teachers in these short courses, which number might be added to the 9,352 in item 3, making about 11,400 in all in teacher-training. There were in all about 68,000 teachers in Canada.
