Infantile Mortality in Canadian Cities.—Table 31 shows for the cities of 10,000 population and over, in the nine provinces of Canada covered in the present registration area, the numbers of infant deaths and the rates of deaths per 1,000 living births for the years 1926-29. In the latest year, Westmount, Que., had the lowest infant death rate, namely, 39·2, with Vancouver, 41·1, the next lowest. Ottawa and Saint John had comparatively high infant death rates, 120·9 and 115·8 respectively; the death rate in the capital shows a decided increase since 1928 and compares unfavourably with those in the other leading cities of Ontario (Toronto, Hamilton and London with 80·3, 74·2 and 61·6 respectively). The infant death rate of the city of Quebec shows a considerable reduction for 1929 as compared with 1928. The rate for Halifax has increased from 71·6 in 1928 to 110·9.

31.—Deaths and Death Rates of Children Under One Year of Age (exclusive of Still-births) in Cities of 10,000 and Over, 1926-1929.
