

A summary of gross and net production is given by industries for the years from 1924 to 1928 in Table 1; a detailed itemized statement of the net value of production in 1926, 1927 and 1928 is given in Table 2.

<sup>1</sup> The gross value of agricultural production here exceeds that given on page 215 in Chapter VIII of this edition of the Year Book, by the amount paid to patrons of dairy factories for milk and cream.

<sup>2</sup> Statistics of custom and repair industries were not collected after 1922, and the totals for that year were repeated in 1923 and 1924. The totals for 1925 to 1928 were estimated according to the percentage change in the data for manufacturing.

<sup>3</sup> The item "manufactures" includes dairy factories, sawmills, pulp-mills, fish-canning and curing, shipbuilding, electric power and certain mineral industries also included under other headings. This duplication, amounting in 1924 to a gross of \$503,446,583 and a net of \$279,310,956, in 1925 to a gross of \$603,132,346 and a net of \$324,348,686, in 1926 to a gross of \$650,369,405 and a net of \$315,033,730, in 1927 to a gross of \$677,458,550 and a net of \$345,247,482, and in 1928 to a gross of \$730,780,507 and a net of \$382,078,720 is eliminated from the grand totals.

<sup>4</sup> The proportion of manufactures, freed from all duplication (as explained in note 3) to the grand total of net production was 34.86 p.c., and under like conditions the proportion of all secondary production to the grand total of net production was 44.61 p.c.

<sup>5</sup> This figure exceeds by \$26,534,207 that given in the Manufactures chapter as the net production of manufactures in 1926. This difference is due to certain duplications in the central electric station industry not having been eliminated when the 1926 figures were first compiled.
