

each of the provinces and in every year the number of girls in the secondary grades has exceeded the number of boys. The drop in the Ontario figures between 1915 and 1917 is due in part to the change in the statistical year from the calendar year to the natural school year from September to June.

¹1924—P.E.I., inc. P.W.C., 719-1,113; 1925—P.E.I., inc. P.W.C., 659-1,087; 1926—P.E.I., inc. P.W.C., 733-1,098; 1927—P.E.I., inc. P.W.C., 648-1,104; 1928—P.E.I., inc. P.W.C., 517-1,014; 1929—P.E.I., inc. P.W.C., 592-1,017. ²Includes the pupils of continuation schools, high schools and collegiate institutes only. In 1928-29 in all secondary grades reported there were approximately 45,653 boys and 52,181 girls. These included full-time day vocational, public and separate schools. The figures in the tables are for comparative purposes confined to continuation and high schools and collegiate institutes. ³The figures given for New Brunswick are approximate.

Subjects of Instruction in Secondary Grades.—The subjects taken in the elementary grades of the provincially-controlled schools are settled by the curriculum, but in the secondary grades there are usually options appealing to different types of pupils, wishing to follow different callings. Statistics of the subjects taken by pupils in secondary grades in 1929, available for six provinces, are presented in Table 6, showing among other things the small number of pupils taking Greek and German and the high proportion studying French and Latin. Tables on pp. 45-55 of the "Annual Survey of Education in Canada, 1929" show in detail the changes in the subjects chosen by secondary grade pupils in the different provinces in recent years.
