Coal Consumption.—The sources of the coal consumed in Canada in the calendar years 1911-30 are shown in Table 23; detailed figures of coal made available for consumption during 1930 are given in Table 24; the difference between the totals of the two tables in the latest year is accounted for by the fact that coal received may be held in bond at Canadian ports and not "cleared for consumption" until required, while coal received in previous years may be taken out of bond (cleared for consumption) in a later year. During 1930 more coal was "cleared for consumption" than was received, stocks held in bond from previous years being drawn upon.
