Percentages of forty industries to grand totals.....	71.8	80.7	75.5	76.4	79.7	78.4

Subsection 4.—The Manufactures of the Prairie Provinces, 1929.

The flour-milling industry is outstanding among the manufactures of the Prairie Provinces. During 1929, as will be seen from Table 13, the gross value of the products of flour mills was greater in each province except Manitoba than that of any other industry, and amounted to \$17,126,466 in Manitoba, \$18,919,062 in Saskatchewan and \$19,796,461 in Alberta, a combined total of about 16 p.c. of the gross value of all manufactures in these provinces. The second industry in point of gross production was slaughtering and meat-packing, with products valued at \$22,370,467 in Manitoba, \$7,070,567 in Saskatchewan and \$19,455,869 in Alberta. Butter and cheese making showed a gross value of production of \$9,953,940 in Manitoba, \$8,471,388 in Saskatchewan and \$7,315,386 in Alberta.

The importance of these industries, based on such natural resources of the Prairie Provinces as grain-growing and cattle-raising areas, is evident. Attention may also be drawn to the generation of electric light and power in all three provinces and the refining of petroleum in Alberta.
