Table 1 shows that in 1931 the estimated agricultural revenue of Canada was \$880,241,000 as compared with \$1,262,047,000 in 1930, \$1,631,081,000 in 1929, \$1,806,020,000 in 1928 and \$1,825,950,000 in 1927. The total for 1931 shows a decrease of \$381,806,000 or 30.3 p.c. as compared with 1930. The decrease, while mainly due to field crops, was general all along the line, tobacco being the only item to show an increase.

Comparing the provinces for 1931, Ontario leads with a total revenue of \$305,624,000, and the provinces next in order are: Quebec, \$181,457,000; Alberta, \$135,219,000; Saskatchewan, \$106,686,000; Manitoba, \$52,379,000; British Columbia, \$35,155,000; Nova Scotia, \$27,335,000; New Brunswick, \$24,067,000 and Prince Edward Island, \$12,318,000.

Wealth.—Table 2 shows approximately, by provinces, the gross agricultural wealth of the Dominion in 1931.

The values of buildings, lands, implements and machinery for the census year 1921 were considerably more than the values previously used in these calculations, which were based upon the census of 1911. The increase for the three items during the decade amounted to \$1,115,986,000. There has, however, undoubtedly been a fall in the value of land during the latest ten years, consequent
