

10.—Weighted Quotients where Precipitation in Crop Year is Divided by Temperature in Growing Period, Expressed as a Percentage of Averages, 1886-1932—continued.

NOTE.—For method of weighting see page 48. Q_w has in all cases been multiplied by 100.

Year.	EDMONTON —concluded.		CALGARY —concluded.		MEDICINE HAT —concluded.	
	Q _w	Per cent of Average.	Q _w	Per cent of Average.	Q _w	Per cent of Average.
