

same as in the earlier, thus obtaining the increases or decreases due to changes in quantity alone; these are shown in the last column. Thus, of a total decrease of 18.5 p.c. in the value of mineral production from 1930 to 1931, declining prices accounted for 8.7 p.c., while decreased quantities accounted for 9.8 p.c. In the metallic group decreased production amounted to only 2.7 p.c.; in fuels to 15.5 p.c.; in other non-metallics to 22.5 p.c.; in clay products to 27.4 p.c.; and in other structural materials to 15.4 p.c.

3.—Mineral Production of Canada, Compared as to Quantity and Value, calendar years 1930 and 1931 ("000" omitted).

Item.	Actual Value 1931.	Value at Prices of 1930.	Actual Value 1930.	Actual Increase (+) or Decrease (-).	Due to Higher (+) or Lower (-) Prices.	Due to Larger (+) or Smaller (-) Quantities.
