<sup>1</sup> Value of shipments by mine operators and of products sold by metallurgical works, less estimated cost of ores, concentrates, matte, etc., treated, irrespective of their origin. The major part of the value of ores treated is included as products of mines and mills, but there is necessarily a lag between production of ores and sales of smelter products, while some imported ores are also treated in Canadian smelters.

<sup>2</sup> Value added by smelting and refining. <sup>3</sup> Includes a small production of peat, normally included in fuels.
