3.—Summary of Statistics of Manufactures, by Industrial Groups, 1920, 1922 and 1925-1931.

Note.—Figures for the Chemical Group published in this table do not correspond with those published in the Annual Report on Chemicals and Allied Products for the following reason. In the report on Chemicals and Allied Products the figures for 1920 to 1928 have been revised and are directly comparable with those given for 1929 and 1930. Prior to 1929 the industry totals included the value placed on intermediate materials and products which were made and used in further processes in the producing works. In 1929 this policy was altered to exclude these intermediates and the figures have been revised on this new basis. Statistics of the non-ferrous metal smelting industries were included in manufactures for the first time in 1925. See footnote to Table 1 p. 406. Statistics for certain years from 1917 to 1924 omitted here are given on pp. 410-12 of the 1931 Year Book.
