## Subsection 4.—The Manufactures of the Prairie Provinces, 1930.

The flour-milling industry is outstanding among the manufactures of the Prairie Provinces when treated as a single unit. During 1930, as may be seen from Table 16, the gross value of production of flour mills was \$41,892,162 (Manitoba, \$13,-467,194; Saskatchewan, \$14,752,468; Alberta, \$13,672,500). The second industry from the point of view of gross production was slaughtering and meat-packing with products valued at \$41,276,942 (Manitoba, \$19,745,659; Saskatchewan, \$5,191,759; Alberta, \$16,339,524). Petroleum products comprised the third largest industrial group, with an output valued at \$22,986,549, followed by railway rolling stock, \$22,403,323, butter and cheese, \$21,946,491 and central electric stations, \$15,937,545.

The order of the leading industries is somewhat different in each province. In Manitoba, the leading industries, with their gross value of products in 1930, were as follows: slaughtering and meat-packing (\$19,745,659), railway rolling stock (\$17,-202,263), flour mills (\$13,467,194) butter and cheese (\$3,519,020) and central electric stations (\$6,574,463). In Saskatchewan the leading industries were: flour mills (\$14,752,468), butter and cheese (\$7,083,895), slaughtering and meat-packing (\$5,191,759), central electric stations (\$4,711,212) and printing and publishing
