

(\$3,517,774). In Alberta, slaughtering and meat-packing (\$16,339,524) was the leading industry, followed by flour mills (\$13,672,500), petroleum products (\$12,267,154), butter and cheese (\$6,343,576) and railway rolling stock (\$5,198,060).

The importance of these industries, based on such natural resources of the Prairie Provinces as grain-growing and cattle-raising areas, is evident.

16.—Statistics of Ten Leading Industries of Manitoba, Saskatchewan and Alberta, 1930.

Note.—Other leading industries, statistics of which cannot be given because there are fewer than three establishments in each industry, are: in Manitoba, bridge and structural steel work and cement; in Saskatchewan, petroleum refining. The statistics for these industries are included in the grand totals for the provinces.
