

In such industries as the manufacture of coke and gas the coal used as a material which enters into the actual composition of the product is not treated as a fuel but as a raw material and is not, therefore, included in the figures of Table 33.

The total annual expenditure on fuel increased by \$4,877,835 or 9.4 p.c. in the 9 years from 1921 to 1930, covered by the summary figures in Table 33. During this period prices of fuels generally have declined. Thus there has been an increase of 56 p.c. in the quantity of bituminous coal used while the value has decreased 2 p.c. The fuels which have shown the greatest proportionate increases are gas and oil.

33.—Total Fuel Used in the Manufacturing Industries of Canada, 1921-30, with Details by Provinces and Groups, 1930.
