

ships were used long after iron hulls were a proven success, and paddle wheels after the introduction of the screw propeller. By 1867 the company's business had shifted to New York and its terminal was moved thither from Halifax. The Allan line had a somewhat similar early history but remained a purely Canadian company. In addition to other lines of less importance, both the C.P.R. and the Dominion Government operate fleets on the Atlantic and the Pacific oceans.

In the following tables statistics are given of sea-going vessels entered and cleared at Canadian ports during the fiscal years from 1901 to 1932 (Table 53); of the nationalities, tonnages of freight carried, and numbers of crews of vessels entered and cleared at Canadian ports in the fiscal years ended 1931 and 1932 (Table 54); of entrances and clearances of sea-going and all ships at principal ports (Table 59); and of the countries whence arrived and to which departed (Table 55). The numbers and particularly the tonnages of vessels entered and cleared at Canadian ports, in both ocean and coasting trade, indicate clearly the predominance of British and Canadian shipping over that of all other nations. This is particularly the case on the Atlantic coast, where the bulk of our European and South American trade is handled. The figures in Table 53 show a significant and fairly steady expansion in the total of ocean shipping through Canadian ports since the beginning of the century, with a relatively slight decline in the latest year.

53.—Sea-going Vessels Entered and Cleared at Canadian Ports with Cargo and in Ballast, fiscal years ended June 30, 1901-06, and Mar. 31, 1907-32.

NOTE.—For corresponding figures for the years 1868-1900, see Canada Year Book, 1911, p. 379.
