¹These figures are preliminary from the 1931 census and should be taken as subject to correction. ²Figures from the Forest Service, Department of the Interior. ³Figures from the Topographical Survey, Department of the Interior. For the Northwest Territories and Yukon, they are approximate only. ⁴From Annual Report of Department of Indian Affairs, 1932. ⁵Woodlots or forested areas of occupied farms as reported in 1931 census. ⁶Estimated as 3 p.c. of occupied and abandoned farms, except for the Prairie Provinces which are from the 1930 Year Book, p. 961. ⁷Assumed to be the sum of occupied and abandoned farms and road allowances, except for the Prairie Provinces. ⁸Figures are obtained from provincial sources. ⁹From the 1930 Year Book, p. 961. This total is not the sum of the items, because of alienated lands in the form of grants to railway companies, grants to the Hudson's Bay Co., school land endowment, etc. ¹⁰These are Dominion lands but are not classed with Crown lands; see footnote 11. ¹¹This classification of Dominion Crown lands includes only Ordinance lands and Military lands in the provinces and does not take into consideration Dominion National Parks and Indian reserves which, while Dominion lands, are set aside by Statute or Treaty and are not now freely disposable by the Dominion Government. In the Yukon and N.W.T. column, however, areas aggregating 338,916,000 acres, which have been set apart by Order in Council as game preserves and sanctuaries in which only native Indians and Eskimos may hunt, but which have not been permanently dedicated to this purpose by Parliament, are still regarded as Crown lands. Such preserves include: the Arctic Islands Preserve, 281,027,000 acres; Yellowknife Preserve, 44,800,000 acres; Slave River Preserve, 1,377,000 acres; Peel River Preserve, 2,112,000 acres; and Thelon Game Sanctuary, 9,600,000 acres. ¹²These are waste lands as regards surface resources only and include rock, open muskeg, burnt-over lands which are not re-stocking, and those above timber line. All such lands are by no means economically barren since in many cases they are sources of valuable mineral wealth. ¹³This total is not the addition of the preceding items because the figure obtained from pro-
