vincial sources of 216,385,000 acres for Provincial Crown lands including leased lands is based on a total land area for the province of B.C. of 238,483,200 acres as against 223,980,800 acres estimated by the Topographical Survey. ¹⁴About 14,713 acres of this is controlled by the Department of National Defence. ¹⁵No estimate available. ¹⁶This item is an approximation got by subtracting the sum of items 4, 6 and 8 from item 10. ¹⁷This item is the total productive and unproductive forest area, by provinces, as estimated by the Forest Service of the Department of the Interior and given, in square miles, on p. 42 of this volume. It should be the addition of items 13, 15, 16 and 17 but is greater than these in certain provinces because item 15 does not include the forested areas of Dominion National Parks for which estimates are not available. Forested areas of Indian reserves are not included in item 15, but are shown separately as item 16. Apart from these exceptions, items 15 and 17 include all Dominion and Provincial lands under forest (Crown lands, National parks, Ordnance lands, Military lands, reserves, etc.). ¹⁸This item includes lands in process of alienation where such are not reported under item 21. ¹⁹For the provinces indicated only. ²⁰There is practically no waste land in New Brunswick.
