¹ The gross value of agricultural production here exceeds that given in Chapter VIII, Agricultural Statistics of this edition of the Year Book, by the amount paid to patrons of dairy factories for milk and cream.

² Statistics of custom and repair industries were not collected after 1922, and the totals for that year were repeated in 1923 and 1924. The totals for 1926 to 1932 were estimated according to the percentage change in the data for manufacturing.

³ The item "manufactures" includes dairy factories, sawmills, pulp-mills, fish-canning and-curing, shipbuilding, electric power and certain mineral industries also included under other headings. This duplication, amounting in 1928 to a gross of \$730,780,507 and a net of \$382,078,720, in 1929 to a gross of \$777,954,427 and a net of \$412,456,114, in 1930 to a gross of \$757,438,326 and a net of \$453,015,547, in 1931 to a gross of \$610,025,080 and a net of \$378,885,534, and in 1932 to a gross of \$425,494,363 and a net of \$260,227,869, is eliminated from the grand totals.

⁴ The proportion of manufactures, freed from all duplication (as explained in note 3) to the grand total of net production was 43.24 p.c., and, under like conditions, the proportion of all secondary production to the grand total of net production was 50.05 p.c.
