

Tobacco.*—In 1933, the commercial tobacco crop of Canada amounted to 39,400,000 pounds from 39,400 acres, as compared with 54,094,000 pounds from 54,094 acres in 1932. The farm value of the tobacco crop in 1933 is estimated at \$5,201,490 as compared with \$6,088,300 in 1932.

Table 33 lists the acreages, quantities produced and average yields per acre for comprehensive figures of the census. For the inter-censal years, the acreage and production statistics quoted relate to the commercial crop only. This distinction is much more necessary in Quebec than in Ontario, since a considerable part of the tobacco production of Quebec comes from small plots.

33.—Acreages and Yields of Tobacco in Canada, by Provinces, 1900, 1910, 1911 and 1920-33.
