

The total irrigable area served by the Canada Land and Irrigation Co.'s project is 130,000 acres, while the New West irrigation district, by agreement with the Canada Land and Irrigation Co., receives a water supply for a further irrigable area of 4,563 acres.

In addition to the irrigated tracts enumerated in the foregoing table, there were, at Dec. 31, 1932, about 343 privately owned projects in Alberta, with a possible irrigable area of 54,930 acres, and at Dec. 31, 1933, 348 projects with a possible irrigable area of 55,617 acres.

Average Value of Farm Lands.—Statistics showing the average value of farm lands in Canada in 1910 and from 1917 to 1934, are given in Table 47. The values are as estimated by crop correspondents and show the rise in land values between 1910 and 1920, the general decline with moderate fluctuations from 1920 to 1929, and the rapid fall since 1929 to a point below the 1910 level for the country as a whole.

47.—Average Values per Acre of Occupied Farm Lands¹ in Canada, as Estimated by Crop Correspondents, 1910 and 1917-34.

¹ Orchards and fruit lands, 1934, with 1933 in parentheses: Nova Scotia \$77 (\$75); Ontario \$84 (\$89); British Columbia \$280 (\$270).

² Actual returns were not collected from crop correspondents in Saskatchewan for 1924, and the estimate of 1924 is interpolated.

Subsection 12.—International Agricultural Statistics.

World Production of Cereals and Potatoes.—Table 48, constructed from data published by the International Institute of Agriculture, shows the areas and yields of wheat, oats, barley, rye, corn and potatoes for the years 1933 and 1934 in countries of the Northern Hemisphere, and for the years 1933-34 and 1934-35 in countries of the Southern Hemisphere. The annual average acreages and yields are also given for the five-year period, 1928-32 (1928-29 to 1932-33), and the areas and yields of 1934 (1934-35) are compared in percentages with those of the five-year period.
