Natural Gas and Petroleum.

Natural Gas.—The production of natural gas increased in value from \$1,346,471 in 1910 to \$10,289,985 in 1930 but has since declined to a value of \$8,712,234 in 1933 and \$8,419,073 in 1934. The producing wells in the east are in southwestern Ontario, and near Moncton, N.B. The principal producing fields in Alberta are the Turner Valley (about 35 miles southwest of Calgary), Medicine Hat, Viking (about 80 miles southeast of Edmonton), Redcliff, Foremost (about 6 miles south and east of the town of Foremost), Bow Island and Wetaskiwin. Wainwright is supplied with gas from the Maple Leaf well in the Fabyan field. The quantity of gas sold or used in 1933 was 23,138,103 M cubic feet. Ontario was credited with about 52 p.c. of the total value but only 31 p.c. of the total quantity, while Alberta produced 45 p.c. by value and 66 p.c. of the total quantity. The production by provinces since 1920 is given in Table 28.

28.—Quantities and Values of Natural Gas Produced in Canada, by Provinces, calendar years 1920-34.

(For the years 1892 to 1919 see Mineral Production of Canada, 1928, p. 188.)
