

### Subsection 2.—Manufactures Classified by the Purpose of the Products.

**Production of Manufactured Goods According to the Purpose Classification.**—In addition to the classification according to the chief component material of the products, used for the industrial census in detailed presentation, a separate and distinct classification, based on the chief purpose of the products, was applied for the first time to the census returns of 1922 and is presented in Table 8 for the years 1922, 1924, 1927, 1929, 1930 and 1931 in summary form, and for 1932 in more detail.

During the period covered by this table, the gross production of the food industries dropped from 27·1 p.c. of the total for all industries in 1922 to 23·2 p.c. in 1932, while the "drink and tobacco" group during the same period rose from 4·0 p.c. to 5·0 p.c. On the other hand, the percentage of the "clothing" group remained about the same, being 9·5 p.c. in 1922 and 10·0 p.c. in 1932. The "industrial equipment" and "books and stationery" groups advanced respectively from 17·0 p.c. and 4·0 p.c. in 1922 to 20·1 p.c. and 5·3 p.c. The following groups, however, declined in importance: the "producers' materials" group dropped from 26·8 p.c. to 25·8 p.c.; "vehicles and vessels" from 6·5 p.c. to 6·0 p.c.; "house furnishings" from 2·6 p.c. to 2·0 p.c.; and "personal utilities" from 2·3 p.c. to 1·7 p.c.

In analysing the relative standing of the two groups which are perhaps of the greatest interest, it is noted that the gross production of the "food" industries in 1932 was 23·2 p.c. of the output of Canadian manufactures, as compared with an output of only 10·0 p.c. for the "clothing" industries. Aside from the fact that a much larger proportion of its products is exported, the greater production of the "food" group was in part due to the higher cost of raw materials, the value added by manufacture being 16·2 p.c. of the total for all industries in the case of the "food" group and 9·4 p.c. for the "clothing" group. The "clothing" industries also gave employment to 11,021 more persons than the "food" industries, but paid out \$2,276,685 less in salaries and wages.

### 8.—Principal Statistics of the Manufacturing Industries of Canada, Classified According to the Purpose of the Principal Product, by Main Groups for Representative Years 1922-32, and in Detail for 1932.
